

THE SUMMIT SCHOOL
PRESENTS

AN INNOVATIVE KNOWLEDGE-SHARING INITIATIVE

Join us Thursday December 8th, 2016 from 7:30am - 9:30am

The Summit School's Knowledge Exchange is an innovative knowledge-sharing initiative designed to bring technology experts together to address strategic insights, trends, challenges and risks within the technology industry.

In 2017, The Summit School will embark on building a STEM Lab/Maker Space for our students. As we enter into the planning phase of the Lab, we will be looking to draw on the expertise within the technology industry, to guide us and to create a collective understanding of emerging technology opportunities. **Lend your knowledge and expertise to help us outfit our school for the next generation of leaders!**

Please RSVP by Friday December 2nd to lisa.seborowski@thesummitschool.org.

insights trends challenges risks

| | |
|---------|---|
