

MAKE **THE MOST** OF YOUR SUMMER

PREVENT SUMMER SLIDE

WHAT IS SUMMER SLIDE?

Summer slide is the tendency for students to **forget what they have learned** in school during the summer.

On average, during the summer, students **experience learning loss** of:

- 2½ months of math skills
- 2 months of reading skills

For students who are already behind and struggling to keep up this is an even **bigger challenge**.

Parents play a key role in filling the gaps for the child to prevent learning loss over the summer.

SUMMIT
CAN
HELP!**

ATTEND CAMP SUMMIT!

Camp Summit students are grouped into small classes based on skill level. They receive personalized attention to accommodate different learning profiles.

Morning academics includes one hour each day of reading, math, and oral/written expression. Afternoons are filled with fun including the arts, cooking, animals, outdoor adventures, sports, STEAM/STEM, water play and field trips.

Camp Summit teachers are highly trained and create a learning environment where campers build self-confidence and get the academic boost they need for back-to-school success.

Parents **LOVE** Summer at Summit

"We love Camp Summit! The teachers and activities were fun and engaging. She looked forward to going to camp every morning."

"The combination of the very small classroom groups and the interactive instruction style really **rekindled the fun in learning!**"

"**My child absolutely loved camp!** Everyone was very professional and very organized. My child is looking forward to next year!"
